PRODUCT INFORMATION

TerraVerm delivers **microbiology** to the soil with a proprietary formulation extract, a liquid soil amendment, to help improve soil conditions. TerraVerm can be used alone or with combination with Vermicompost.

BENEFITS:

- Easy application with existing fertilization and irrigation systems.
- Pure vermicompost extract, not lab grown microbes.
- Sustainable solution for soil health.

DILUTION & MIXING:

- Vermi-extract should be diluted with water.
- For best results, use well water, rain water, or dechlorinated tap water.

RECOMMENDED APPLICATION TIMING:

- Apply Vermi-extract 1 - 2 days after liquid fertilizer application.
- Apply Vermi-extract once the root zone is adequately irrigated.
- Once Vermi-extract application is complete, rinse irrigation lines with water.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Soil Amendment Ingredients:

Vermicompost Extract (Derived from earthworm castings) 100%

Microbes:

Pseudomonas putida..... 300,000 cfu/ml

Contains plant growth promoting microbes.

Contains non-plant food ingredients.
